Narrative: Rain and low clouds limited visibility and the use of air resources until late in the day. Terrain and limited access are hampering control efforts. Because of the limit on air resources, Demob of some crews was delayed.

Rain and cooler temperatures allowed crews to make good progress on direct line construction north of the Chatanika River. Thirteen Smokejumpers were released today due to the change in the weather. Crews on the west flank continue to build direct line toward the Hard Luck Fire scar. On the northeast section of the fire, crews worked to hold and improve the line.

Crews on the west flank will continue to build and secure line from H-20 west toward the Hard Luck Fire scar. Direct line will be constructed on the south flank north of the Chatanika River. On the northeast flank, crews will continue to hold and improve the line from the ridge down to Washington Creek. Contingency lines are being constructed south of the Hayes Creek Subdivision in the Hayes Creek drainage.

Aviation is still a limiting resource.

Narrative: The fire is 7% contained with smoldering and burning out of jackpots. Perimeter control was expanded along the west flank of the fire with, 75% of the slopover contained in Division B. New objectives were outlined to contain the fire spread on the south flank, through a combination of direct and indirect tactics, to protect the community of Healy Lake. Low clouds and smoke inhibited air operations and visibility for part of the day, particularly on the east side of the fire. Little fire spread is anticipated for next twelve to forty-eight hours. Actions planned for 6/10 are to hold and secure the west perimeter (Div A, B, G, H) and to expand perimeter control to the northeast from the South Fork of Goodpaster River. Alternatives are being evaluated for checking fire spread to the south. Overhead and crews are being ordered to replace resources about to time out.
